Descriptions

Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to extract or extrapolate knowledge and insights from noisy, structured and unstructured data, and apply knowledge from data across a broad range of application domains

t Everything you will learn from this course

- ✓ Successfully perform all steps in a complex Data Science project
- ✓ Perform Data Mining in Tableau
- ✓ Apply Ordinary Least Squares method to Create Linear Regressions
- ✓ Create a Multiple Linear Regression (MLR)
- ✓ Use Backward Elimination, Forward Selection, and Bidirectional Elimination methods to create statistical models
- ✓ Transform independent variables for modelling purposes
- ✓ Install and navigate SQL Server
- ✓ Create Conditional Splits in SSIS
